## Master Prompt Library: 14 Professional ElevenLabs Music Examples

The following collection showcases the art of precision prompting for AI music generation, featuring **14 professionally-crafted prompts** that demonstrate the full spectrum of creative possibilities with [ElevenLabs Music](#). Each prompt represents a masterclass in balancing **technical specificity** with **creative vision**, illustrating how strategic word choice transforms abstract musical concepts into stunning, production-ready tracks.

### What Makes These Prompts Exceptional:

**Genre Mastery** - From cinematic orchestral scores to underground dubstep, Latin reggaeton to vintage 1950s crooner tracks, these prompts span virtually every musical landscape with authentic genre conventions and cultural nuances.

**Emotional Precision** - Notice how each prompt captures not just sound, but *feeling*. Terms like "haunting," "nostalgic," "powerful," and "ethereal" guide the AI toward specific emotional territories that resonate with listeners.

**Technical Sophistication** - Advanced elements like BPM specifications (140 BPM for dubstep), production techniques ("analog," "vinyl crackle," "reverb-soaked"), and instrumentation details ("braam horns," "808 bass," "tribal percussion") demonstrate professional-level music vocabulary.

**Vocal Direction** - Multiple examples show how to specify vocal characteristics with remarkable detail: "soft whispery high-pitch voice," "charismatic male vocalist MC," "old crooner male vocalist" - each creating distinctly different sonic personalities.

**Structural Intelligence** - The prompts reveal how to communicate musical architecture: "catchy chorus," "powerful finale," "rising tension," "half-time rhythms" - directing the AI's compositional decisions with precision.

Study These Patterns:

As you explore each prompt, observe the **layering technique** - how general genre descriptors are enhanced with specific instrumental choices, production styles, and atmospheric elements. This methodology transforms basic musical ideas into rich, multi-dimensional compositions that sound professionally produced rather than algorithmically generated.

These examples represent the **gold standard** of AI music prompting, demonstrating how creative vision combined with technical vocabulary unlocks the full potential of artificial intelligence music generation.

*Use these prompts as templates, inspiration, or direct starting points for your own [AI music creation](#) journey with [ElevenLabs Music](#).*

**Into the Jungle:**

Mysterious original soundtrack, themes of jungle, rainforest, nature, woodwinds, busy rhythmic tribal percussion.

**Obsidian:**

Extremely dark, tense and powerful, cinematic sound design, electronic hybrid, trailer music, evil, braam, braam horns, impacts, boom, rising tension, completely instrumental.

**One Time More:**

Neo-soul with a perfect female vocalist, catchy beautiful chorus, smooth, lush, influences from r&b, slow, groovy bass, soft keys, clean high quality production.

**Andrenalina:**

Latin reggaeton with a powerful charismatic male vocalist MC, Spanish, influence from dancehall, high quality modern production, dembow, catchy, slow.

**Slip Away:**

Stunning female vocalist with a soft whispery high-pitch voice, ethereal, very slow, deep, slow, warm, nostalgic synths, analog, modern pop anthem, very catchy chorus.

**Croydon Heater:**

Classic UK dubstep in the style of early dubstep. Dark, minimal, and atmospheric. Deep sub-bass, half-time rhythms, sparse percussion, echoing snares, and dub-influenced FX. Emphasize space, tension, and weight. 140 bpm.

**Ascension:**

Short powerful orchestral track with an awe-inspiring final motif, orchestral horns and brass, cinematic, tension, epic, instrumental.

**Wanderer of the Moor:**

A young english girl singing an old english folk song, stunning, lonely, thoughtful and almost haunting, fiddle and english folk instrumentation, reverb, short song.

**Saddles and Shadows:**

An epic track for a cowboy show, wild west, cinematic sound design, guitar twanging with awesome orchestral elements crescendoing to a powerful finale, soundtrack.

**Echoes of Midnight:**

Dreamy, psychedelic, slow Indie Rock, reverb-soaked vocals, retro keys, catchy chorus, analog, phased guitars, liminal, nostalgic feeling, anthem.

**Endless Dream**

Dreamy, psychedelic, slow Indie Rock, reverb-soaked vocals, retro keys, catchy chorus, analog, phased guitars, liminal, nostalgic feeling, anthem.

**Self Control:**

Modern Afrobeats, deep 808 bass, minimal contemporary percussion, smooth and charismatic male vocalist, sensual pace, sexy, slow, modern pop hit with influences of 2020s afrobeats and some r&b.

**Heartbeats:**

Deep, cool, slow pop track. Chill house anthem, Soundtrack to the summer, top hit with influences from underground, warm thick pluck bass, very catchy chorus, high quality production.

**Don't Let Me Go:**

A very retro track from the 1950s with an old crooner male vocalist, charming, vintage, classic, nostalgic, golden oldies, vinyl crackle, catchy vocal hooks.
